You have 100 acres clear, 50 of which you keep as pasture and for meadow. Make up advantage to do so, for we pledge ourselves to cell your mind to work only 20 act 25 being put down to clover and timothy, as 25 being put down to clover and timothy, as mind to work only 25 ucr s; the other you best can. You have manuve enough in and about your farm for six acres. This year haul that on to you land; plough it and put in corn; with a little ashes, and if you can get it, slaked lime or plaster to every hill. Plough twice as deep as usual an drag twice as long. with a long toothed drag, till the land is like If you have got 85 bushels to the the acro before, we can warrant you now 70 writeles, northe quantity we have, (or have not,) of or 80; for you cultivate and hoe the corn such article. Suffice it to say we have a twice as much like alse. You double your crop at a very little increases cost. Having no more manure, you must depend on deeper ploughing and better dragging for the other ploughing and better dragging for the other our Drags and Prices before going to Tiffin city ten acres for this year; not forgetting to sow Sandusky city, or elsewhere, as we do know that a little more seed than usual, if it is not outs we can sell as cheap as any of them, and we are or barley. In the fall sow wheat where the bound to do it any how. corn was, with the same care; and next spring; manure the next six acres for corn. Yes, but you may manure 10 or 12 acres; for you have had 25 more acres for hay, or out straw cut green for fodder, and can keep 25 more cows and all we recommend them, we will pay all dan through the winter; and knowing the value ages. We do not ask ran to take our word for i

Thus, every two or three years, all your land will get a dressing of manure, and every year you will have a different crop on it. E. ery year it will improve, and you grow rich with about balf your work. But after awhile sow a few acres of this land with clover and timothy, and break up as much of your old You will get double the crop of hay on the new piece, and a good crop of grain or the old piece. In one word, of all men in the Vegetable, for the cure this truly dreadful disease world, a farmer should work a small piece o land; work it theroughly; keep all the stock he can to make manure; keep the manure dry, and he will not be a small farmer long. We have tried it and we know it. For the We have tried it not we know it. For the rest, take and read a good farmers' newspar Groceries, Queen's Ware, a large and splen-per.

How PRAIL WE PRESURVE Eggs .- This is ment of the "grand question." We have in the course have been recommended, and sometimes have succeeded and sometimes failed; from which results you will say it is no more than fair to enclude that none of the methods are infalliced. In offering our Goods to the Public, we are considered and sometimes failed; from which results you will say it is no more than fair to enclude that none of the methods are infalliced. In offering our Goods to the Public, we are considered and sometimes have another than more varied and solended stock can not be found in this part of the State.

An examination of the Tariety, Quality and Prices of the Public, we are considered that more varied and solended stock can not be found in this part of the State. of our life tried marly all the expedients that just received. ble. We have learned one fact from these buyers that this is the place to make their purchas experiments. Eggs should be perfectly fresh holding out the inducement that we sell "cheaper when you begin to preserve them. If an egg has commenced, even but a very slight de-composition, it is difficult arresting it; indeed we are inclined to think nothing sar of freezing will doit. The following very simple plan Uniformly Low prices and no Deviwe have never tried, and know nothing practically whether it be effectual or not. We found it in the farm Journal quoted from the a very choice English Agricultural Gazette, We pass it o ver to our readers for their consideration.

Take a half inch board of any convenient length and breadth, an pierce it as full of holes (each 14 inches in diameter) as you can. I find that a board two feet and six inches in length, and one foot wide has five dezen in it length, and one foot wide has five dezen in it. ray twelve rows with five each.

nail them together edgewise in a rectangui throughout the season.

from the poultry house, the small end down and they will keep good for six months, if Taken in exchange for Gooder also Produce in CLOUD & GARVIN. you take the following precautions. Take exchange. CLOUD & GARVIN. care that the eggs do not get wet, either in the nest or afterwards. (In summer bens are fond of laying among the weeds and grass, and any eggs taken from such nests in wet weather, should be put away for immediate use.) Keep them in a seel room in summer WE HAVE removed our Store to Sharp & and out of the reach of frost in winter. It two boards be kept one can be kept while the

The writer accounts for the preservation of tendency to sink down against the shell, than when the egg is laid on one side-certainly if the volk touches the shell it spoils immediate ly .- Maine Farmer.

Winter rye should be sown in the early part of September, and thus give time for the roots to become well established, so as not to be thrown out by frosts during winter. By sowing thus early it may be used as apring folder for cattle and sheep if desired.

One Dollar Only, Daguerreotypes at Wiles' Skylight

Over the Post Office. AVING concluded that all shall have Daguer-scoppes who desire them, I shall bereafter put up pictures in good, plain cases at the extreme-ly low price of one dular; believing that the in-crease of business will compensate for the reduc-tion of prices, while those getting pictures ting pictures will receive more than the worth of their money. The same style and quality of pic-tures can now be had for one dollar that formerly cost one dollar and a half. I can say, without hescost one dollar and a half. I can say, without hes-itation, that I am better prepared for taking da-guerrectypes than any artist has heretofore been in this section of country, having spared no troub-ble nor expense in anytging that relates to a com-plete apparalus or well furnished room; and as to pic-tures. I only ask people to call and see them for themselves. Grown persons can get as good pic-tures in cloudy as in fair weather, and some even better, so do not wait for fine days. Children should come on fair days, as the time of sitting is less. Dark dresses are best for copying in daguerreotypes. Gilt and gold lockets, also every style of fancy cases constantly on hand.
